RESIDENTIAL WOOD WASTE PROGRAM

The Connell residential wood waste program has officially started. We will be working with the community in accepting your woody debris at the shop yard or can pick up at your residence. All drop-offs or "pick ups" will be scheduled through Public Works. There will be no deliveries to the shop yard without a Public Works employee present.

The wood waste program will start the 1st of April and run through October 31st.

Woody debris consists of small trees (6" diameter or smaller), limbs, dry tumbleweeds, and similar debris. Leaves and grass clippings can be disposed of through BDI in your garbage bin.

The City may refuse any delivery of wood waste that appears to be contaminated or mixed with garbage, metal, concrete, rocks, barbed wire or other similar items. Only wood waste generated within the City limits will be allowed for processing, unless otherwise approved by the Public Works Director.

Cost:

Self Haul \$10.00 per load

Onsite processing \$50.00 per hour (one hour minimum charge)

City Haul \$25.00 per load

Charges will be billed to your solid waste bill.

To schedule a drop off or pick up time, or if you have any questions regarding the program, please call 234-6431.
